

# Making Hydrogen – Technician's Notes

## Advance Preparation

### ***Chemicals***

Sodium Hydroxide (NaOH, 6 M) solution

Aluminium Foil (Al)

Detergent in water (adding a bit of glycerol can help to make the bubbles stay!)

### ***Equipment***

Crystallising dish

Test tube with side arm

Test tube stopper

Rubber tubing

Clamp stand

Plastic pipette with bulb cut off

Splint

Matches

Pipette

### ***Preparation Instructions***

1. Make sure all equipment and chemicals listed above are available.
